The winebox 2024 is a symbol of valuable collaboration

Designing a case for a bottle might seem like a simple task at first glance. However, achieving true simplicity often requires navigating complex processes. Years of collaboration with barth have highlighted their unparalleled expertise in working with a diverse range of materials. This mastery provided a reliable foundation for developing the concept. After the initial presentation, the pivotal step was refining the idea further, which ultimately led to the innovative use of surplus materials from their inventory. Each winebox 2024 is a masterpiece in its own right – uniquely crafted, both in feel and appearance – serving as a tangible and striking expression of artistry and craftsmanship.
